

# The South Downs Way

v1 by Richard Smith 2018

For 4 players - starts at Winchester N, Winchester S, Eastbourne N, Eastbourne S

The operators are building a narrow gauge tourist line which may not connect with existing railway stations with the exception of Winchester and Eastbourne. Bridging national railway lines (black dotted line) costs the same as rivers. Lines may not extend beyond the national park boundaries (green area). The orange hexes are bus connections for special runs. Each operator is allowed just two connecting half hexes to each of these, same for Winchester and Eastbourne.

Beauty spots (star symbol) and country parks (tree symbol) are worth 3 for the first to connect. In all races, the operators' routes must include at least one beauty spot or country park to be valid. When connecting to a beauty spot or country park, a turntable is installed at no extra cost. During the race this can be used to allow the train to double back if the operator is unable or does not wish to pass through the hex. Using the turntable costs 2 movement points paid for by the incoming or outgoing dice roll or one from each.
